

**Q1 to Q8 have only one correct answer. Choose the correct option to answer your question.**

1. Which of the following operators is used to calculate remainder in a division?

- A) #
- B) &
- C) %
- D) \$

Ans. C) %

2. In python 2//3 is equal to?

- A) 0.666
- B) 0
- C) 1
- D) 0.67

Ans. B) 0

3. In python, 6<<2 is equal to?

- A) 36
- B) 10
- C) 24
- D) 45

Ans. C) 24

Here, << is the bitwise left shift operator. Bitwise operators operates on binary numbers.

Binary number of 6 is 0000 0110 and left shift operator will shift the bits of the number to the left and fills 0 on voids right as a result.

So, 6<<2 = 00011000 that is the binary number of 24.

4. In python, 6&2 will give which of the following as output?

- A) 2
- B) True
- C) False
- D) 0

Ans. A) 2

Here, 6 = 0110

2 = 0010

6&2 = 0110

&

0010

= 0010, which is the binary number of 2 itself.

Here, & is the bitwise and operator. Bitwise And Operator returns 1 if both bits are 1 else 0.

5. In python, 6|2 will give which of the following as output?

- A) 2
- B) 4
- C) 0
- D) 6

Ans. D) 6

Here, | is the bitwise or operator. Bitwise Or Operator returns 1 if either of the bit is 1 else 0.

Here, 6 = 0110

2 = 0010

6|2 = 0110

&

0010

= 0110, which is the binary number of 6 itself.

6. What does the finally keyword denotes in python?

- A) It is used to mark the end of the code
- B) It encloses the lines of code which will be executed if any error occurs while executing the lines of code in the try block.
- C) the finally block will be executed no matter if the try block raises an error or not.
- D) None of the above

Ans. C) the finally block will be executed no matter if the try block raises an error or not.

7. What does raise keyword is used for in python?

- A) It is used to raise an exception.
- B) It is used to define lambda function
- C) it's not a keyword in python.
- D) None of the above

Ans. A) It is used to raise an exception.

8. Which of the following is a common use case of yield keyword in python?

- A) in defining an iterator
- B) while defining a lambda function
- C) in defining a generator
- D) in for loop.

Ans. C) in defining a generator

**Q9 and Q10 have multiple correct answers. Choose all the correct options to answer your question.**

9. Which of the following are the valid variable names?

- A) \_abc
- B) 1abc
- C) abc2
- D) None of the above

Ans. A) \_abc and C) abc2

10. Which of the following are the keywords in python?

- A) yield
- B) raise
- C) look-in
- D) all of the above

Ans. A) yield and B) raise
